## Discusses American Far East Policy

METUCHEN — The 3,700 families on the island of Quemoy are more afraid of the possibility of American retreat than they are of the unrelenting Communist military barrage," the Middlesex County Conservative Club was told last night.

Lyle H. Munson, president of Bookman, Inc., publisher of anti-communist books, discussed American Far East policy at the club meeting at the home of Richard F. Plechner, 48 Spring St.

Munson, a former plans officer for the Central Intelligence Agency in the Far East, provided personal glimpses of what he labeled "America's endless retreats from international communism in that critical area of the globe."
